

Backyard Scavenger Hunt

ACTIVITY

Living things are constantly interacting with the environment they live in. An **ecosystem** is a community of living things and the relationships they have to themselves and the nonliving things around them (rocks, dirt, water). How many different things can you find in your backyard ecosystem?

How Many Can You Find?

- Ant hill
- Snail
- Pine cone
- Berries
- Tree stump or log
- Squirrel
- Flowers
- Seeds
- Pollen
- Rocks
