

How to make

Fresh Salsa

You will need:

- // A medium sized bowl
- // 6 tomatoes (Roma, or whatever you have)
or a 15 oz can of tomatoes
- // ½ 1 small jalapeño finely diced
- // ½ 1 small jalapeño finely diced
- // ½ 1 lime, juiced
- // ½ cup cilantro, finely chopped
- // Salt and pepper to taste
- // Pinch of oregano or cumin (optional)

Do you like a smooth or chunky salsa?

Use a food processor or blender to mix all the ingredients together if you like it smooth.

If you like a chunkier salsa, you can just dice up the vegetables and mix by hand. Season your salsa with some salt & pepper. Experiment with adding a pinch of oregano and/or cumin. Blend well and then you are ready to break out the tortilla chips and enjoy!

Tips & Instructions

You can be endlessly creative and use what you have on hand. No fresh tomatoes? You can use canned tomatoes! Don't have fresh herbs? Use dried!

Experiment and have fun!
